

Stocklist over capacitors, produced in former Russia. New old stock (nos).
 Hasling Audio Systems, Danmark. June 8, 2008

Capacitors are listed in increasing values. Stock numbers/value are typically 20 - 150 pcs.
 Matching of pairs are offered better than 1%, single or more/pair.

Capacitors delivered to customers have been burned in, and checked on nominal value, after being in stock for several years, and also controlled for evt. leakage current at nominal voltage.

Quite generally I can say that the above types are conservative rated on the nominal DC value.
